Solar Accounting

Roles & Permissions Guide

Plain-language reference for every built-in role: what it is for, what staff do day to day, and which permissions unlock the screens.

Generated 2026-10-15

How roles work

Each user is assigned one or more roles. The session permissions are the union of those roles. Menus appear only when the matching *.view permission is present. Action buttons (Submit, Approve, Pay, Issue) also check create/approve/pay/issue permissions and separation of duties.

Separation of duties
The creator of an expense cannot approve, reject, or pay it. The requester of a project material or milestone cannot approve or recognize it. Assign a second person with the approve/pay role for those steps.

Typical expense path: Project Manager creates and submits !’ Branch Manager or Finance Manager approves !’ Finance Manager (different user) pays from a cash account.

Typical project path: Project Manager creates/activates and requests materials !’ Branch Manager or Finance Manager approves materials !’ Project Manager issues stock !’ Project Manager adds milestones !’ approver recognizes revenue.

Built-in roles

Super Administrator

Role code: super_administrator

Full system owner. Configures the company, users, and every module. Use sparingly for break-glass and setup work.

What this role does

- Opens every menu and performs every action in the product.
- Creates users, assigns roles, and manages company settings.
- Can create, approve, and pay expenses — but must not approve or pay documents they themselves created (separation of duties).

Permissions summary: All permissions in the catalogue.

Managing Director

Role code: managing_director

Executive oversight. Reviews company and branch reports and gives final commercial approvals.

What this role does

- Views dashboard and company/branch reports.
- Approves sales, purchases, and expenses after staff submit them.
- Opens Sales, Purchases, and Expenses lists to act on pending items.

Permissions summary: View + approve for sales, purchases, and expenses; company and branch reporting; notifications.

Finance Manager

Role code: finance_manager

Controls the ledger, banking, payroll payouts, and high-value expense/project approvals.

What this role does

- Reviews and approves journals; closes and reopens accounting periods.
- Approves and pays expenses (not ones they created).
- Approves project materials and milestones; views project detail.
- Reconciles banks, transfers cash, runs company reports, and manages documents/imports.

Permissions summary: Accounting, expenses (view/approve/pay), projects (view/approve), banking, payroll approve/pay, settings/audit/imports.

Central Accountant

Role code: central_accountant

Day-to-day company accounting: journals, closing prep, and reporting without expense payment authority.

What this role does

- Creates and approves journals; prepares daily closing packs.
- Views expenses and projects for reconciliation context.
- Reconciles banks and prepares payroll runs (does not approve payroll payments).

Permissions summary: Accounting create/approve, expenses.view, projects.view, banking reconcile, payroll.create, reports, documents/imports.

Branch Manager

Role code: branch_manager

Runs a branch: reviews branch activity and approves purchases, expenses, and projects for that branch.

What this role does

- Views sales, purchases, inventory, expenses, and projects for the branch.
- Approves purchases, expenses, and project materials/milestones.
- Reviews branch reports and daily closing.

Permissions summary: Branch reports, expenses view/approve, purchases view/approve, projects view/approve, inventory/sales view, documents.

Branch Accountant

Role code: branch_accountant

Branch bookkeeping support: journals, closing prep, and expense visibility without approval rights.

What this role does

- Creates journals and prepares daily closing for the branch.
- Views expenses, projects, accounts, and payroll drafts.
- Reconciles bank activity for the branch.

Permissions summary: Journal create/view, expenses.view, projects.view, payroll.create, branch reports, banking reconcile.

Sales Officer

Role code: sales_officer

Front-line selling: quotes, invoices, and customer records.

What this role does

- Creates and views sales documents.
- Applies allowed discounts.
- Maintains customer visibility for billing.

Permissions summary: sales.create/view/discount, customers.view, notifications.

Procurement Officer

Role code: procurement_officer

Buys goods: purchase orders and supplier records.

What this role does

- Creates and views purchase documents.
- Works with supplier master data.

Permissions summary: purchases.create/view, suppliers.view, notifications.

Inventory Officer

Role code: inventory_officer

Warehouse control: stock moves, counts, and goods receipts.

What this role does

- Views inventory positions.
- Transfers stock and performs counts.
- Receives goods against purchases.

Permissions summary: inventory.view/transfer/count, purchases.receive, notifications.

Project Manager

Role code: project_manager

Runs installation projects and raises related costs and material requests.

What this role does

- Creates projects (draft or active) and requests material issues.
- Creates expense drafts and submits them for approval.
- Cannot approve their own expenses, materials, or milestones (another role must approve).

Permissions summary: projects.view/create/issue, expenses.create/view, inventory.view, dashboard, notifications.

Auditor

Role code: auditor

Read-only assurance across commercial, stock, and ledger data.

What this role does

- Views sales, purchases, inventory, accounting, projects, and reports.
- Reviews users, branches, settings, audit log, and documents.
- Cannot create, approve, or pay operational documents.

*Permissions summary: Broad *.view permissions plus audit.view; no create/approve/pay actions.*

Quick matrix — expenses & projects

Who can open the module vs who can act:

- Open Expenses list: any role with expenses.view (Managing Director, Finance Manager, Central Accountant, Branch Manager, Branch Accountant, Project Manager, Super Admin).
- Create / Submit expense: expenses.create (Project Manager, Super Admin).
- Approve / Reject expense: expenses.approve and not the creator (Managing Director, Finance Manager, Branch Manager, Super Admin).
- Pay expense: expenses.pay and not the creator (Finance Manager, Super Admin).
- Open Projects: projects.view (Finance Manager, Central Accountant, Branch Manager, Branch Accountant, Project Manager, Auditor, Super Admin).
- Create / Activate / Add milestone: projects.create (Project Manager, Super Admin).
- Request / Issue materials: projects.issue (Project Manager, Super Admin).
- Approve material / Recognize milestone: projects.approve and not the requester (Finance Manager, Branch Manager, Super Admin).

After updating roles

Run pnpm db:seed so new role permissions are linked in the database. Users must sign out and sign back in (or refresh session) to pick up the updated permission set.
